Figure 1 is a flowchart illustrating the calculation of the Net CO₂ Purchase Factor. The flowchart starts with the main title "Net CO₂ Purchase Factor" at the top. Below this, the formula is presented as:

$$\text{Net CO}_2 \text{ Purchase Factor} = \frac{\text{Net CO}_2 \text{ Purchase Factor}}{\text{Net CO}_2 \text{ Purchase Factor}}$$

The flowchart then branches into two main categories: "Net CO₂ Purchase Factor" and "Net CO₂ Purchase Factor". Each category further branches into "Net CO₂ Purchase Factor" and "Net CO₂ Purchase Factor". The flowchart ends with a box labeled "Net CO₂ Purchase Factor".
